OPERATING INSTRUCTIONS

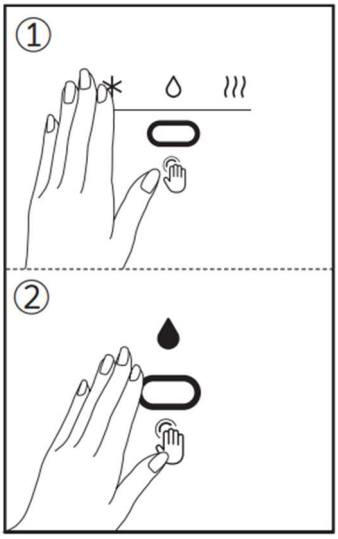
The below pictures show the front user interface (UI) and control panel for the ***i12 Ice and Water Dispenser,*** as well as the Beep Operation Signal table.

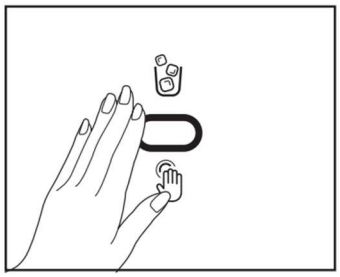
Operation beep sound

※ A beep sound following operation of the product.

	Division	BEEP	Remarks/occurrence
❶	Power ON	Ding dong dang~	once
❷	Key input	Ding~	once
❸	Water Dispensing Start	Ding~	once
❹	Water Dispensing Ending	Ding~	once
❺	Overflow	Ding~ding~ding~ding~	One second interval
❻	Ice dispensing	Ding~ding~ding~ding~ding~	once

To Select Water:
Place your hand close to the WATER SELECT IR SENSOR. Move your hand away and back to the sensor to select the next option. **Cold Water → Ambient Water → Hot Water** is the selection order.
*Your hand should be 3-4cm away from the sensor to activate.
*Move your hand back and forth to cycle.
*If the sensor does not detect motion for more than 5 seconds, it will switch to the default mode (Cold Water).



To Dispense Water:
Place your hand close to the DISPENSE IR SENSOR (Right Sensor) and hold there to dispense. Remove your hand to stop.
*If both sensors (SELECT & DISPENSE detect any motions simultaneously, then the unit will recognize this as an error and will not operate.


To Dispense Ice:
Place your hand close to the ICE DISPENSE IR SENSOR (Left Sensor). Hold your hand in place to dispense ice, remove to your hand to stop.
