

SERVICE REQUIREMENTS

⚠ WARNING! *Read and understand the contents of this manual before attempting to service WL350 Water Treatment System. Failure to follow the instructions in this manual could result in death, serious personal injury, or severe property damage. Only trained and qualified technicians should attempt to install, maintain, or service Waterlogic Equipment.*

1. Visually inspect all electrical and water connections for signs of wear or damage.

⚠ DANGER! ***HIGH VOLTAGE ELECTRICAL HAZARD.** Unplug before inspection and service.*

2. **Waterlogic** recommends changing the UV Lamp every 6 months.

⚠ WARNING! ***ULTRAVIOLET RADIATION.** Protect your skin and eyes against ultraviolet rays. Never look directly at an operating UV light. Disconnect before removing UV Lamp.*

⚠ CAUTION! ***UV LAMPS ARE HAZARDOUS.** Lamps are considered Hazardous Waste and must be disposed of accordingly. Refer to Product MSDS sheet for details.*

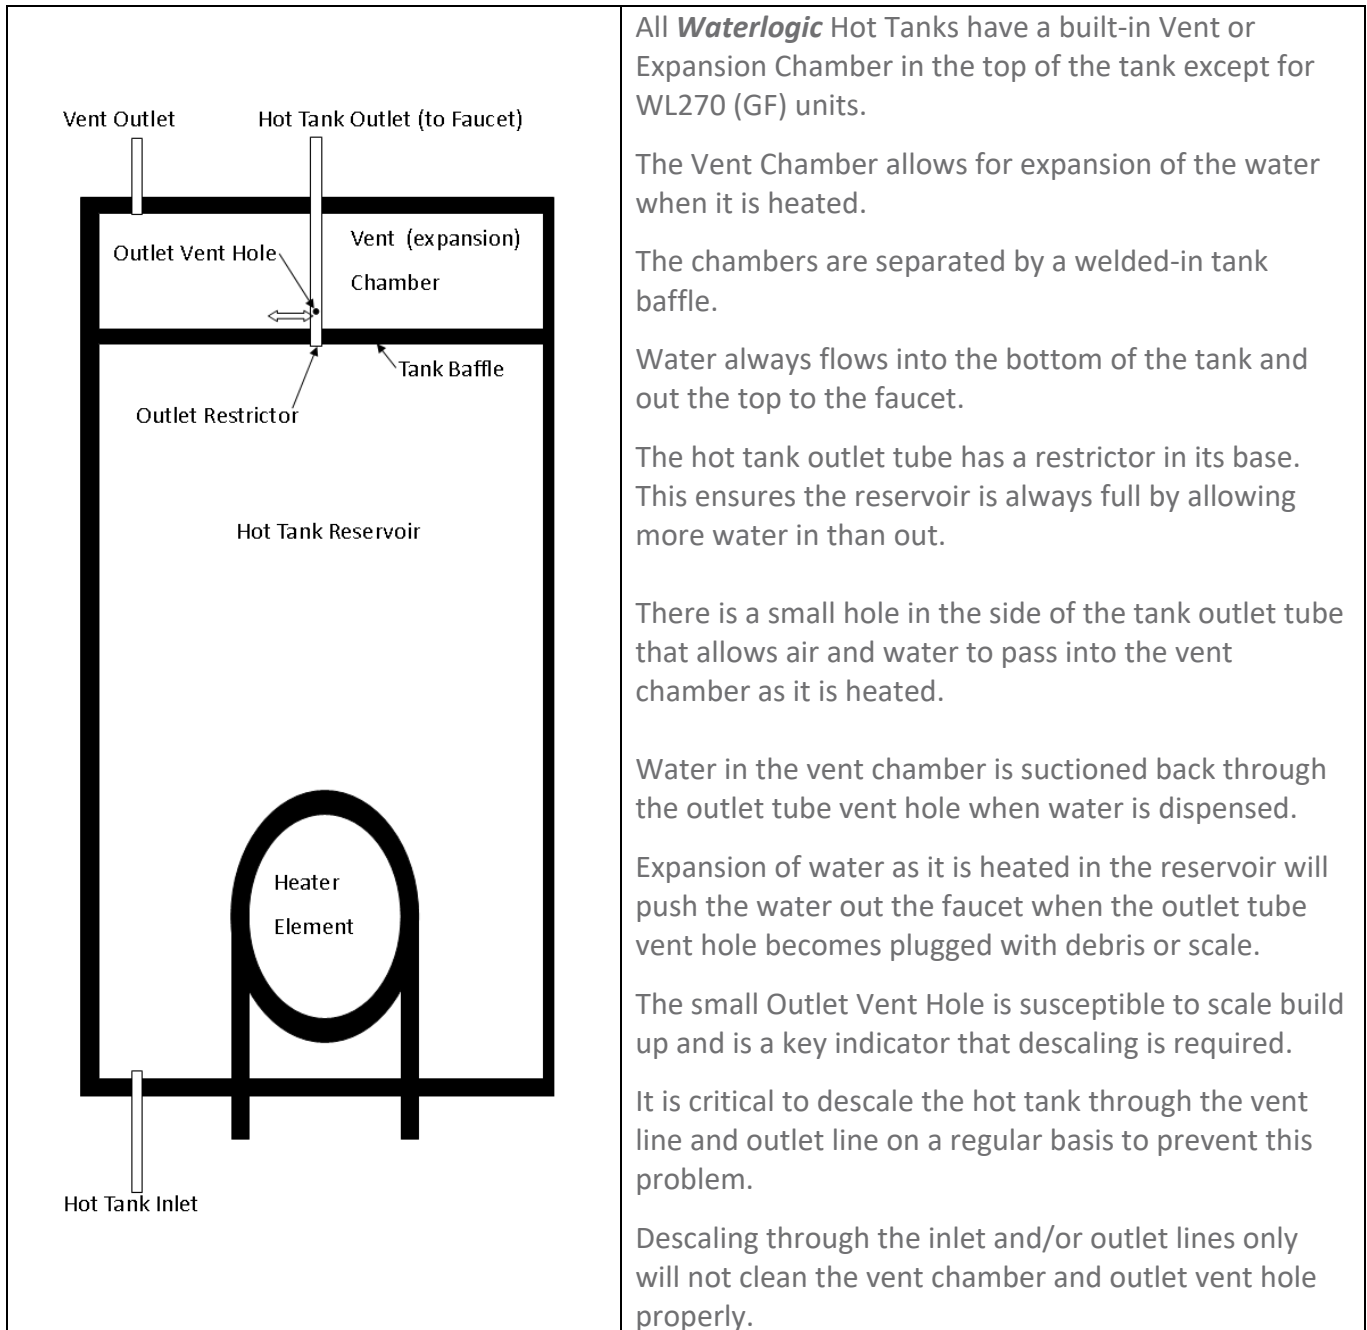

3. Clean the Spiral Quartz Sleeve that surrounds the UV Lamp with a non-abrasive cloth, descaling solution, or ultrasonic bath if needed when changing UV Lamps.

⚠ CAUTION! ***UV SYSTEM IS FRAGILE.** Never handle the UV lamp or Quartz Sleeve with bare hands. UV Lamp and quartz sleeve must be free of oils and contaminants to ensure proper operation. Use a soft non-abrasive cloth to clean.*

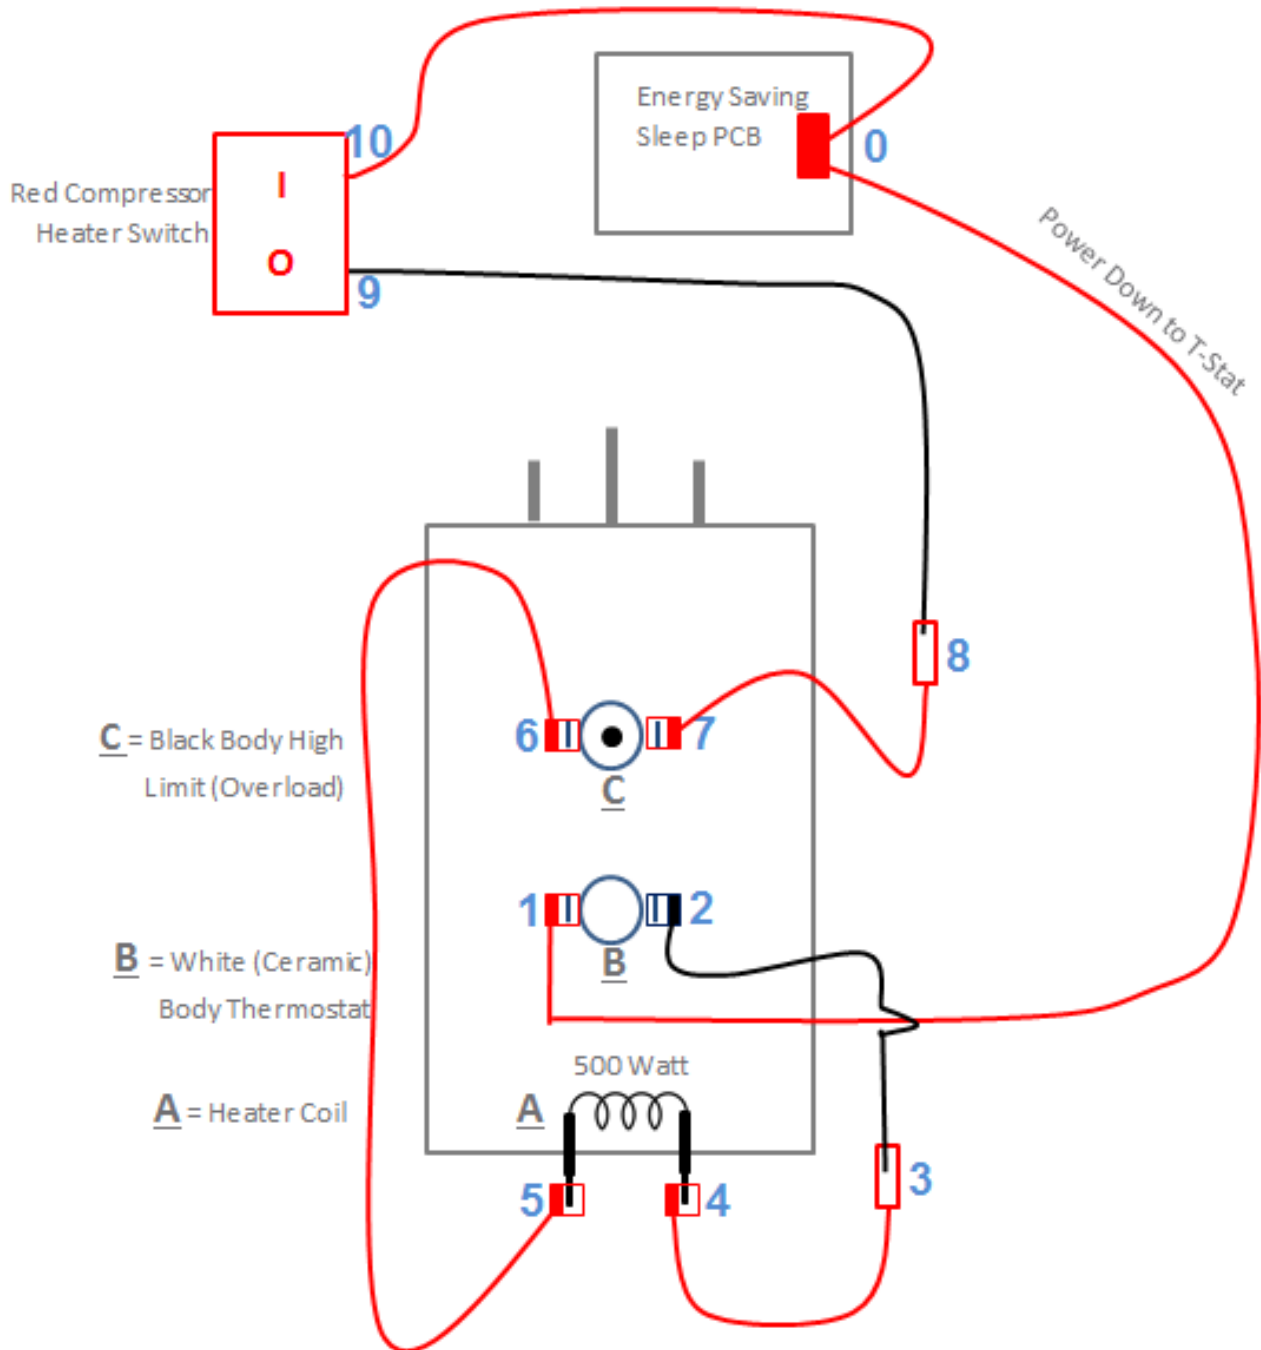

4. Sanitize the Cold Tank per instructions in the pre-installation procedures.
5. Clean and sanitize external surfaces of the unit. Use soap and water or chemicals that are compatible with ABS plastic and will not damage or degrade the product surfaces.
6. Remove and clean the Faucet. Replace as needed.

⚠ WARNING! ***SANITIZER MAY CONTAIN HAZARDOUS CHEMICALS.** Use of proper personal protective equipment such as rubber gloves and eye protection is required.*

HOT TANK PRINCIPLES OF OPERATION

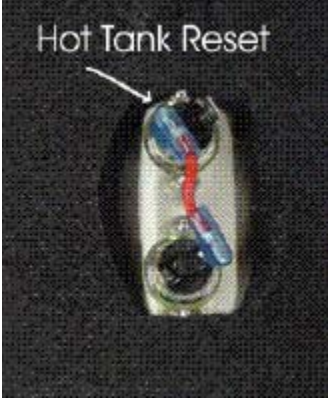

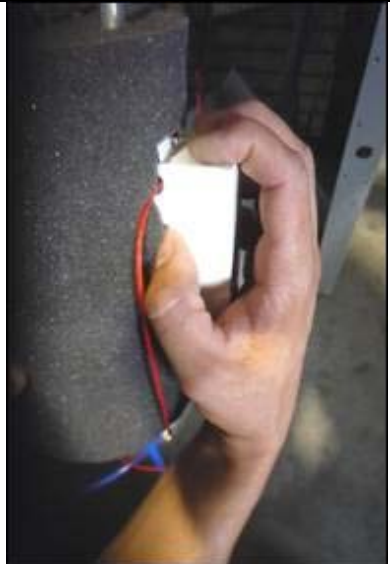

HEATER CIRCUIT – HOT TANK WIRING

RESETTING THE HOT TANK OVERLOAD OR HIGH LIMIT SAFETY

1.	Red Compressor/Heater Switch must be in the <i>O=OFF</i> position	
2.	Unplug the Power Cord from rear of WL350 Water Treatment System .	
3.	<p>Tower Model: Remove the <u>Lower Front Panel</u> by removing the Phillips Head Screws underneath the Lower Front Panel.</p> <p>Counter Top Model: Remove the <u>Side Panel</u> by removing Phillips Head Screws from Side Panel.</p>	
4.	Locate the Protective Metal Box on the rear of the hot tank. As you look through the condenser coils on the rear of the unit, you will see the hot tank located on the right-hand side.	
5.	<p>From the front of the Water Treatment System, reach up behind the hot tank and take hold of the protective metal box covering the thermostat and overload on the hot tank.</p> <p>There are nuts that secure the Protective Metal Box to the Hot Tank, are loose enough to allow you to remove the Protective Metal Box.</p> <p>If the nuts on the metal box are too tight, loosen the nuts securing the Hot Tank to the upper base of the WL350 Water Treatment System unit and lower the Hot Tank so you can remove the Protective Metal Box.</p>	

6.	<p>For demonstrative purposes, photos below have lowered the hot tank from the unit.</p> <p>Press the reset button</p> 	
7.	<p>Reattach the Protective Metal Box by depressing the top flap of the Protective Metal Box so it snaps back into its original position on the Hot Tank.</p>	
8.	Replace the Lower Front Panel.	
9.	Plug in the Power Cord.	
10.	<p>Turn on the Red Compressor/Heater Switch <i>I=ON</i> position</p> <p>The Hot and Cold tanks must be filled with water BEFORE turning on the Red Heater and Compressor Switch.</p>	
11.	Verify the cooler is fully operational before installing it at the customers' site.	

HOT TANK DESCALING INSTRUCTIONS

The Hot Tank requires removal of mineral deposits (descaling) on a regular basis. Typically descaling should take place every 6 to 12 months to preserve the long-term health of your unit.

Use non-toxic cleaner such as ScaleKleen, DEZCAL, 20% Citric Acid Solution, or Undiluted Vinegar Solution to remove mineral deposits as directed by the manufacturer depending upon filtration and local water conditions.

Descaling is an important process that removes calcium deposits, or scale, that can build up inside a tank over time. Calcium and scale is non-toxic but left unattended will hinder your unit's performance.

⚠️ WARNING! **PERSONAL PROTECTIVE EQUIPMENT REQUIRED.** *Always ensure proper ventilation and use rubber or nitrile gloves and eye protection when using chemicals. Refer to Material Safety Data Sheet for specific requirements of each product.*

⚠️ CAUTION! **STAINLESS STEEL TANK DESCALING.**
The Hot Tank is made from stainless steel. Ensure descaling solution is compatible with stainless and always flush the unit completely. Dispose in an environmentally safe manner.

Materials Needed:

- Personal Protective Equipment. Rubber or Nitrile Safety Gloves and Protective Eyewear
 - Phillips Screwdriver
 - Temperature Gauge
 - Water Pitcher or Container to collect water from the faucet
 - 19 Liter (5 gallon) container or drain basin
 - Citric Acid Based Cleaner
 - ¼" Plastic Tubing, at least 4 feet in length, and assorted ¼" quick connect fittings
 - Sanitizing Cartridge
 - Food Coloring
1. Put descaler per directions and 3 drops of food coloring into the descaling cartridge.
 2. Connect descaling cartridge to the inlet water supply and connect to Inlet Bulkhead Fitting on the back of the **WL350 Water Treatment System**. Turn on Water Supply.
 3. Select Hot Water and depress the Main Dispensing Button on the Front Control Panel until descaling solution (colored water) comes out of the faucet. Container and drain basic will be required to catch water from the faucet.
 4. Turn off water supply and remove sanitizing cartridge from inlet water supply. Reconnect water supply to inlet fitting.

5. Allow descaling solution to remain in the Hot Tank for 15 minutes (length of time may vary depending on water conditions).
6. Place a pitcher, catch basin or other container under the faucet of the **WL350 Water Treatment System**.
7. Flush the Hot Tank until water runs clear.
8. Once clear Water dispenses from the faucet the Hot Tank has been descaled. Always ensure the **WL350 Water Treatment System** is performing to the customer's satisfaction.

⚠ WARNING! HOT WATER. *The WL350 Water Treatment System produces Hot Water up to 86°C (187°F). Water above 52°C (125°F) can cause severe burns or scalding. Hot water should be dispensed carefully into insulated container to avoid injury.*

⚠ CAUTION! MUST REPLACE HOT TANK 3-5 YEARS DEPENDING ON USAGE. *The Hot Tank and its controls must be replaced a minimum of every three to five years to ensure efficient and dependable operation.*

⚠ WARNING! REINSTALL ALL PANELS AND COVERS. *Always reinstall all Panels, Protective Covers, and Fasteners after servicing equipment. Failure to do so could result in severe personal injury and will void the certifications and warranty of the equipment.*

FIREWALL OUTLET SOLENOID – REVERSE FLOW ORIENTATION

Firewall Outlet Solenoid – Reverse Flow Orientation

Firewall outlet solenoid must be installed backwards or reverse flow to allow water expansion bypass and prevent over pressure and bursting of the cold tank.

Solenoid Flow Indicator shown should point toward cold tank as shown below:

Flow
Indicator
Arrow

LG COMPRESSOR UPGRADE

*Parts List in this manual updated to reflect these changes.

New LG Compressor 120V R134A 1/8HP CSB035LJCM with external start/run capacitor.

New LG Compressor with External Start/Run Capacitor

External Capacitor

New LG CSB035 LJCM Compressor

Repair/Replacement Parts for are not interchangeable with older/other compressors.

Older version of LG compressor is obsolete and no longer available.

New LG CSB035LJCM 120V R134A 1/8HP Compressor Repair Parts

Part # CO-0017-L00-00	LG Compressor 120V CSB035LJCM-PTC Relay
Part # CO-0018-L00-00	LG Compressor 120V CSB035LJCM-Overload Protector
Part # CO-0019-L00-00	LG Compressor 120V CSB035LJCM-Capacitor

ADJUSTING COLD SET POINT

Cold Water Temperature – Factory Set Point is 41°F (5°C) and can be adjusted to 34°F - 54°F (1.1°C to 12.2°C)

The cold set point can be adjusted by accessing the cold thermostat adjustment screw under the decal at the rear of the unit.

Remove the red portion of the Cold Tank Temperature label to access the adjustment screw.

The factory set point is ~41°F and is indicated by the dot on sheet metal.

Turning the adjustment screw clockwise to lower the set point temperature.

Do not adjust past the “Max Cold” position at 3:00 position to avoid freezing the cold tank.

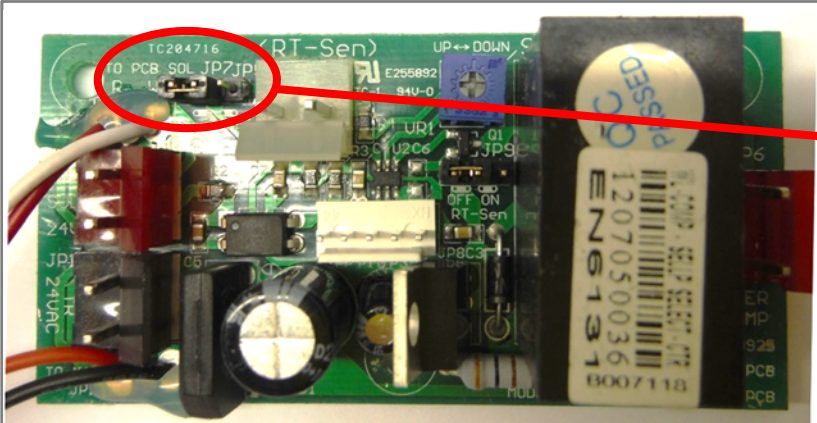

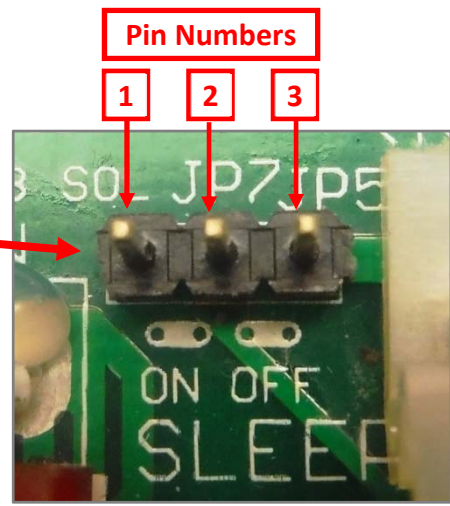

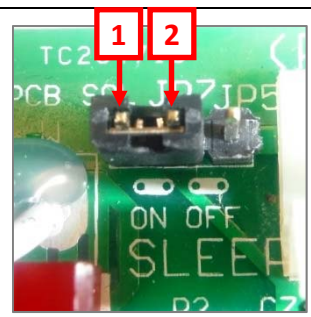

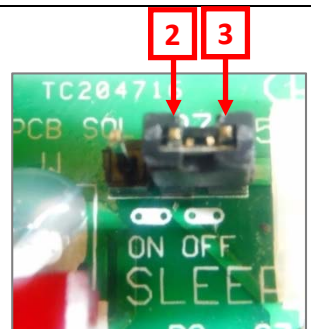

Turning the adjustment screw counter-clockwise to raise the set point temperature.

PROGRAMMING INSTRUCTIONS

DISABLING ENERGY SAVING SLEEP MODE

All **WL350 Water Treatment Systems** come from the factory with Energy Saving Sleep Mode engaged to meet the Energy Star Certification requirements. Energy Saving Sleep Mode disables the heater circuit if the unit has not been used for a continuous 3 hour or longer period. Selecting any button "wakes up" the **WL350 Water Treatment System** and turns the heater circuit back on. The hot tank will typically take less than 10 minutes to heat the water from ambient to the 85°C (185°F) set point.

Unplug Power Cord and remove Top Cover to access Heater Control PCB.

Heater Control PCB- P/N EN-6131 – WLCP PN 20-0075	
	
<p>WL350 Water Treatment Systems comes with the Energy Saving Sleep Mode "ON" - the Default Position.</p> <p>PCB Jumper JP7 in the "ON" position (Pin 1 and 2)</p>	
<p>Deactivate the Energy Saving Sleep Mode by moving PCB Jumper JP7 to the "OFF" position (Pins 2 and 3).</p>	

PROGRAMMING INSTRUCTIONS

CHANGING FROM HOT TANK THERMOSTAT TO THERMISTOR CONTROL

All **WL350 Water Treatment Systems** come from the factory programmed for a Hot Tank Thermostat. Currently the WL350 Hot Tank uses a Thermostat. The option to change to a Thermistor Control is for a future Hot Tank design. *Do not change to Thermistor or it will disable the Hot Tank.*

Unplug Power Cord and remove Top Cover to access Heater Control PCB.

Thermostat Heater Control is the default.

PCB Jumper JP9 in the "ON" position (Pin 1 and 2)

Thermistor Heater Control

The option to change to a Thermistor Control is for a future Hot Tank design.

Do not change to Thermistor, it will disable the Hot Tank.

PROGRAMMING INSTRUCTIONS

DIP SET-UP CHANGING HOT WATER MODE TO AMBIENT WATER

WL350 Water Treatment Systems comes defaulted with Hot / Cold water, which can be changed to Ambient / Cold settings. DF1 settings default is to Hot /Cold.

Unplug Power Cord and remove Top Cover to access Energy Saver PCB.

REPLACEMENT COMPONENTS - CONSUMABLES

Component	WLCP PN	Frequency of Replacement
15W LTFW XTM UV Lamp	12-8310	Every 6 months, or as required Factory Part No CT-2085-IA0-00
Hot Tank 87°C (187°F)	12-5615	Replace every 3 to 5 years depending on usage. Factory Part No HT-3041
1-micron 10" Inline CBC Filter for CTO, Lead, Cyst and Asbestos Reduction (Carbon Block) Required for NSF Certification	FT-0063-IL containing FT-0064 Filter Element	Every 6-months or every 1,250 gallons. Factory Part No FT-0063-IL Assembly containing FT-0064 Filter Element

** One pre-installed. One required for NSF-42 / NSF-53 Certification.*

Replacement parts can be obtained from *Waterlogic* or an *Authorized Waterlogic Dealer*. See Parts Layouts, Drawings, and Parts Lists for additional repair parts.

Hot Tank Service

Hot Tanks (with controls) must be replaced at least every 3 to 5 years depending on usage. Descaling Hot Tank may be required on a regular basis depending upon filtration and local water conditions. See Service Section.

NOTE:

At the **end of this product's life**, ensure that it is disposed of in an environmentally friendly manner which is fully compliant **with all Federal/State/Local Requirements and Guidelines**.

Verify compressor in machine before ordering parts as the Compressor P/N CO-0020-L00-00 and 10-2200 (CO-0001A) and related parts are not interchangeable.

CO-0020-L00-00 Compressor

48A.1	CO-0020-L00-00	LG Compressor 120V R134A CSB035LJCM	CO-0020-L00-00	Yes	
48A.2	CO-0019-L00-00	Compressor Capacitor	CO-0019-L00-00	Yes	
48A.3	ST-0216-L00-00	Capacitor Bracket	ST-0216-L00-00	Yes	
48A.4	CO-0017-L00-00	PTC Relay	CO-0017-L00-00	Yes	
48A.5	CO-0018-L00-00	Overload Protector	CO-0018-L00-00	Yes	

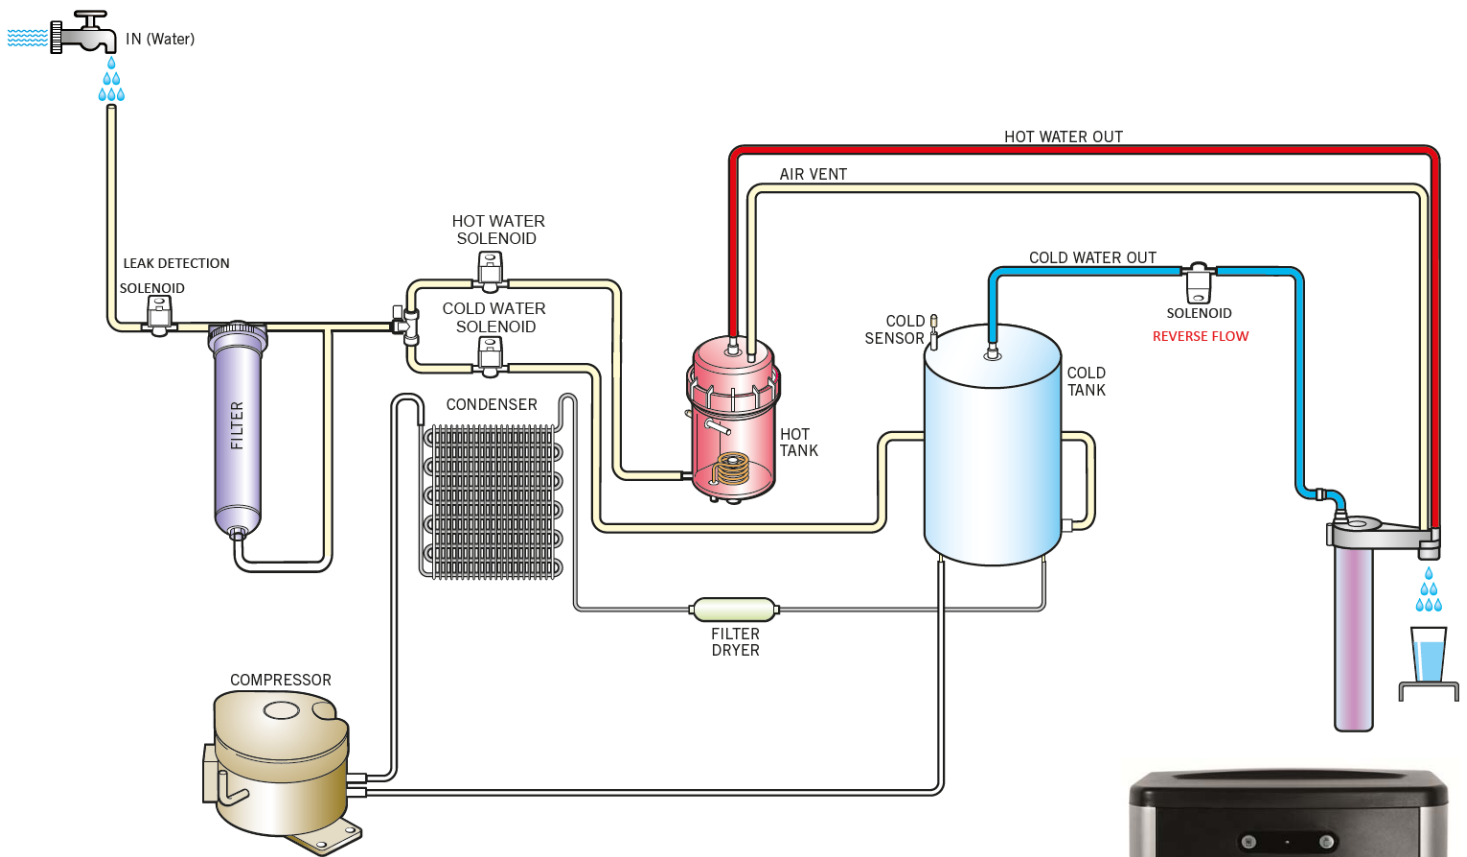

CO-9001-A / 10-2200 Compressor

48B.1	10-2200	Compressor (R134a 1/8HP) 120V/60Hz	CO-9001-A	Yes	
48B.2	10-3003	Compressor Starter Relay	CO-9016	Yes	
48B.3	10-5018	Compressor Overload	CO-9015	Yes	
Not shown	10-3007	Power Cord 120V – 1840 mm	EL-5001-B	Yes
